Type RSBAR/80/2 in search bar to source video

The 8 Series Support Bars are designed to prevent flexing of two "4 Series" cabinets when they are bolted together in an 8 Series Frame.

- 1** Using 8x Dog Point Screws, fix 4x Brackets to your desired height.

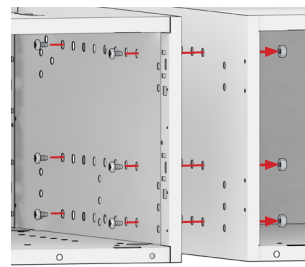

The top of the bracket should sit just below where you want the bottom of the cabinets to rest.

Ensure you select correct holes A, B or C to match your cabinet selection. Refer to the table and diagram below.

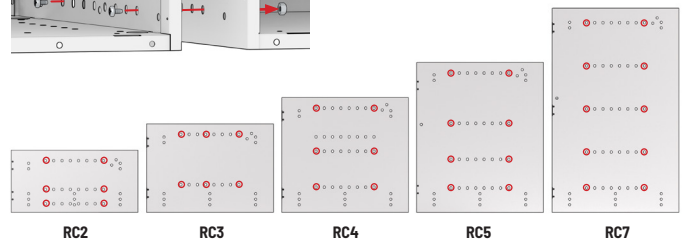

- A** RC2
- B** RC3
- C** RC4, RC5, RC7

- 2** Attach the RSBAR to the brackets using 2x Dog Point Screws per bracket.

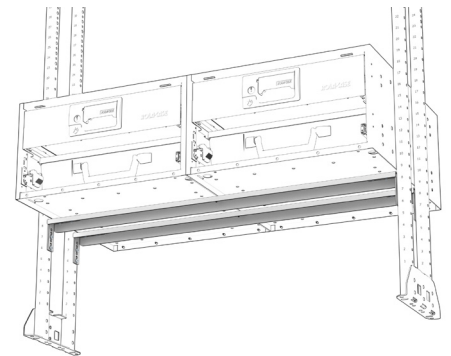

- 3** Fix 4 Series cabinets together using M6 screws and nyloc nuts and lift onto RSBARS. (Ref. diagram below for screw quantity and hole locations for each cabinet size).

- 4** Move cabinets to desired position and fix cabinets to posts using 8x Dog Point Screws. *Screws supplied with cabinets

(Ref. Cabinet Instructions for fixing cabinets to posts)

- 5** Ensure you have fixed the screws securely through the correct holes and the part is level.

Note: Frames and cabinets are sold separately.
